

MEDICAL MALPRACTICE

FEES: For my fees regarding medical malpractice cases please click on the following link to see the fee table. Fees range from 30.0% to 40.0%. The range of fees is dependent upon the amount of work that must be done, in other words the fees vary depending upon whether your case settles, goes to arbitration or proceeds to a trial, but NEVER more than 40.0% for cases that require jury trials or bench trials (trials by Judge). As always there is no fee or costs if there is no recovery. Also, there is never a fee or charge for consultations.

Medical malpractice most often results in horrific injuries including the loss of life and the ability to enjoy life. When we go to our doctors and hospitals we entrust our lives to those physicians and institutions. When they fail us we are left to pick up the pieces. Malpractice can occur in a myriad of situations: The failure to timely diagnose diseases such as cancer or infections; The performance of unnecessary surgery; The failure to properly recognize surgical complications; The negligent performance of surgical procedures; The failure to recognize or take heed of warning signs such as in the delivery of newborns, to the monitoring of monitors during surgical procedures resulting in bleeding or loss of oxygen. The results of these failures can range from permanent debilitations, brain damage, paralysis to death. If you think you or a loved one has been the victim of negligent medical care, please call me to discuss what happened. I have a physician network to investigate any potential claim. There is never a fee for consultation or my investigation into your potential claim. While medical malpractice litigation can never reverse what happened, it can provide the means to help a victim better cope with the future and to try to prevent future mistakes so others do not have to suffer as you have.
